Good morning,

I attached the final student Campus Climate Survey results. Please share these results with department chairs and strategic planning committee and Achieving the Dream.

The common themes that emerged from the survey and student comments were the following:

1. Create a class schedule that will allow students to meet academic goals.

2. Offer quality tutoring services to meet educational needs.

3. Make library services responsive to student academic needs and student schedules. The library must also encourage a quiet study environment.

4. Improve communication regarding cultural events and workshops on campus.

5. Improve communication about student clubs on campus and provide different types of clubs (service, social, professional, etc.)

6. Provide a Spanish language college orientation to inform about credit courses, services, and financial aid (Spanish Survey result). Students also requested more access to credit courses in the evening.

For more information on these items, review the survey results and student comments.
