

Early Childhood Education AS-T

The mission of the Child Development program and Associate in Science in Early Childhood Education for Transfer is to provide an environment for quality learning for a diverse population of students in the discipline of Child Development. Our courses, programs, and activities are designed to educate, inform, and model “Best Practices” for educating and nurturing young children, working with families, and providing services to the community in a variety of early childhood educational careers. The program is designed to meet the educational and vocational training needs of those who are preparing for employment or who are presently employed in public (Title 5) or private (Title 22) preschools. The Child Development Department and Child Development Center laboratory school collectively provide the education and vocational training necessary for LASC Child Development students to succeed in their higher educational/transfer goals, individual career choices, and professional business plans.
